

No calls from telemarketers have made a distinct positive change in my home environment. I do not understand why any business wishes to call and solicit from me as my answer is always NO. I do not respond to or trust telephone solicitations. I am forced to either be rude or simply hang up. What right do these people/businesses have to intrude on my privacy at any time they choose? Please allow Wisconsin's no call law to remain strong. Do not interfere with state's rights and my rights. Thank you.
